To All Concerned---

We are glad to announce to all cream producers that our Acme Branch is, and has been since January 1, 1929, on a co-operative basis; that is that all profits over expenses of operating and marketing will at the end of the year be divided among patrons, according to the amount of butter fat produced. The poor outlook for crops at the present time should induce every farmer to produce all cream possible. We will be glad to have you call and talk this important matter over.

WHEAT POOL MAKES PAYMENT

SECOND INTERIM PAYMENT

A second interim payment on the wheat delivered during the past crop year was announced by the Alberta Wheat Pool last week. The basis of this payment is:

1 Northern	17½c
2 Northern	14c
3 Northern	13½c
4 Wheat	18½c
5 Wheat	12c
6 Wheat	4c
Feed Wheat	3½c

Besides the above, payments were made on something like eighty other grades ranging as high as 46½c on 3 Tough Smutty wheat, to as low as 3c on broken wheat.

The total amount of the payment made by the Alberta Pool was over eight million dollars. There will be another payment during the coming fall.

Deductions for elevator and commercial reserves and for operating expenses, totalling 4c a bushel, have been made from the payment to members.

This amount is slightly more than will be required, but the exact figures will not be available for some time yet, at the end of the Pool's year. When the final figures are available the excess will be refunded to members along with the final payment.

Taking every phase of the marketing year into consideration it must be admitted that this interim payment is on the whole a very good one. It may appear to some that the payment on No. 6 and Feed wheat is proportionately small, but it must be remembered that when the initial payment on the higher grades was cut from \$1.00 to 85c last fall the payment on No. 6 and feed wheat was cut only by 5c a bushel.

Coming as it does at a time when crop conditions generally are none too promising this Pool payment will be thrice welcome. The size of the payment will undoubtedly be a surprise to some for it was predicted during the low range of wheat prices in the spring that the Wheat Pool might possibly be unable to make any further payments.

On the new crop the Wheat Pool has announced the initial payment will be on the basis of \$1.00 a bushel.

HESKETH AND CARBON LAWN TENNIS CLUBS PLAY HERE

A match was played at Carbon on July 31st and Aug. 2nd between the teams representing Hesketh and Carbon Lawn Tennis Clubs. In Division 6 of the Alberta Lawn Tennis Association. The result was a win for Carbon by six events to one. The following are the details and scores:

Men's Singles—H. Longstaff of Carbon defeated H. Bingham of Hesketh 6-4, 6-5.

L. Poxon of Carbon defeated L. Brown of Hesketh 6-2, 4-6, 7-4.

Ladies Singles—Miss K. Rammay of Carbon defeated Mrs. Hunter of Hesketh 6-0, 6-5.

Men's Doubles—L. Brown and H. Bingham of Hesketh defeated L. Poxon and H. Longstaff of Carbon 5-6, 6-1, 6-4.

H. Brown and C. Nash of Carbon defeated T. Heath and J. Ridgeway of Hesketh 6-1, 6-1.

Ladies Doubles—Mrs. Laing and Miss E. Braisher of Carbon defeated Mrs. Hunter and Mrs. Brown of Hesketh 6-2, 6-4.

Mixed Doubles—H. Brown and Miss James of Carbon defeated T. Heath and Mrs. Brown of Hesketh 6-3, 5-6, 6-0.

The curling rink has received a coat of paint.

POLICE COURT NEWS

Jack Gibson of the Carbon district appeared before Justice of the Peace, W. A. Braisher, on Thursday, August 1st on a charge of the second offence of intoxication. The charge was laid by Const. Moriarity. The accused pleaded guilty to this charge and was given the minimum sentence under the act, which is \$200 and costs. The fine and court costs were paid.

LITTLE ITEMS OF LOCAL INTEREST

Mr. and Mrs. Len Poxon left on Sunday for a holiday at Banff, prior to leaving for the Peace River district to visit with Mr. and Mrs. Harry Bruels.

The Misses Annabelle Ramsay and Vera Poxon spent the week end visiting at their homes in Carbon. They returned to Calgary on Tuesday.

Mrs. Suitor and son and Mrs. Robertson and family are visiting with Mr. and Mrs. T. J. Ramsay.

Mr. and Mrs. E. E. Ramsay and family have moved into Lindsay Elliot's house.

Mr. and Mrs. Jira Hay and family returned Monday night from a six weeks visit in Eastern Canada.

Miss Florence Luft returned Monday night from Calgary.

Mr. and Mrs. C. Knisely and son returned last week from a two months motor trip to United States points.

Mr. and Mrs. Geo. Malton and family are holidaying in Eastern Canada.

Miss Daphne Nash has accepted a position in the store with her father, C. H. Nash.

Messrs. Ross Thorburn and H. N. McNaughton motored into Calgary on Tuesday. They have shipped two cars of cattle to De Winton.

Mrs. J.E. James returned last week after spending a few weeks visiting with her daughter, Mrs. Morrison, at Oyen.

C. H. Nash has installed another gasoline pump in front of his store.

Mr. and Mr. E. J. Rouleau and son returned Monday after spending the past couple of weeks holidaying in British Columbia. Miss Elsie Rouleau returned with them and will spend a couple of weeks here.

Dr. and Mrs. McFarlane are holidaying at Banff.

Dress Making and plain sewing. Prices reasonable.—C. Neville, Carbon.

Ross Thorburn received word that his father had died Monday night at his home in Stanley, New Brunswick.

A good shower favored the Carbon district Monday night.

Dr. and Mrs. Falcons of Stanley, New Brunswick, were visiting with Mr. and Mrs. Ross Thorburn for a couple of days last week and left for their home in the East on Sunday.

CANADA'S FISH HATCHERIES

Revised figures show that during 1928 the Fish Culture division of the Fisheries branch distributed 470,302,380 fish and fish eggs to assist in maintaining and increasing Canada's fishery resources. The distribution was over fifty-nine per cent larger than in 1927 when the total was 295,283,782. A feature of the 1928 work of the

(Continued on back page)

WHEAT CUTTING STARTED HERE

CUTTING BECOMING GENERAL

Cutting commenced in the Carbon district last Monday, July 29th and since that time many have been seen on the fields with the binder. Most of the crop on the summer fallow is being cut with the binder and on the stubble where it was predicted that there would be no yield at all, the heads have filled out in some fields and this will be salvaged with the header wherever it is possible to do so. The average yield on the summer fallow is predicted to be between fifteen and twenty bushels to the acre, while some farmers state that they will get twenty-five and thirty bushels. This will be exceptionally good when it is considered that we have had little rain this year and the land has held up with the little moisture that was in the ground this spring.

As we go to press we have reports that some of the farmers have completed the cutting of their entire wheat crop.

Cyril Poxon has been confined to the house with the flu this week. He had entered for the Alberta Lawn Tennis Junior Championship held in Calgary, but was prevented by illness from attending. Alf Braisher had entered for the Men's Singles and was drawn against W. Holladay of Drumheller, but owing to business reasons was also unable to compete.

SWALWELL SUNDAY SCHOOL HOLDS SUCCESSFUL PICNIC

The Swalwell Sunday School picnic was held on Friday last at the farm of Mr. O. S. Gore. The children and their parents turned out in good numbers and a most enjoyable time was spent. Numerous races were run, the following being the successful prize winners:

Class 1. The little tots each received a prize.

2nd Class Girls—B. Whysma, 1st; Josephine Nemic, 2nd.

2nd Class Boys—Fred Hilker, 1st; Jim Robinson 2nd.

3rd Class Girls—Flora Hamilton 1st; Elaine Elliott 2nd.

Senior Boys—Cyril Gibbs, 1st; Bill Waldron 2nd.

Senior Girls—Frances Kletzky 1st; Mabel Evans 2nd.

Mrs. Lorne Hunter carried off the prize in the ladies race.

Extra races were run, the prize winners being:

Girls—Doris Wyndham 1st; Bernice Powers 2nd.

Boys—Stanley Young,
Child's race—Daisy Young.

Reform Of Electoral Methods

Recent elections in Great Britain, in Canada, and more recently still in the Province of Saskatchewan, all seem to point in the same direction, and that is to a change in the system or methods of choosing Parliamentary representatives. For many generations the underlying principle of the British system of responsible government has been ruled by the majority of the people as indicated by their selection of party representatives in the House of Commons or Legislative Assembly, as the case may be. And such representatives were chosen, for the most part, by constituencies represented by a single member. So long as the electorate were divided into only major parties or groups of political thought this system worked fairly well, although it was never wholly representative of public opinion.

Now, however, that the two-party system has been, or is being, replaced by three and sometimes four or more parties, the weaknesses of the old system have become apparent, and the old principle of rule by majority is rapidly becoming impossible of realization. On the contrary, at Westminster, at Ottawa, at Regina, each party represented in Parliament is a minority party, and in each instance the smallest of these minority groups holds the balance of power. In each of the legislative bodies referred to, the group having the largest representation in the House constitutes the government party, but at any moment, and on any question that may arise, the government may suffer defeat and be called upon to give place to another minority group.

With the exception of the United States where the two-party system continues in favor, partly, perhaps, because it is so interwoven into the whole fabric of government, national, state, municipal, even county and judicial, it appears to be giving way throughout the world. In Germany, France, Belgium, and other countries having responsible government, government is only possible by a coalition of parties, or a working understanding between them. Admittedly, it does not make for strong government or stability in government, France being a notable example.

The multiplication of political parties or groups has, in most European countries, brought about a change in electoral methods. In some, single member constituencies have been abolished, the single transferable ballot, or Proportional Representation adopted, or the second election system inaugurated. Even in the United States the primary system almost amounts to a second election. In a word, it is recognized that the single member constituency where a mere plurality of votes is sufficient to elect, regardless of the number of candidates in the field, no longer meets the needs of the situation.

And it is becoming increasingly evident that it will not for long prove acceptable to the people of Great Britain, or Canada, or in the Provinces of Canada. Opponents of Proportional Representation have always argued that it tends to a multiplication of parties or groups, but the fact now has to be faced that this multiplication has taken place under the existing system. The system itself, therefore, must be altered to meet the changed conditions.

Most politicians will not welcome any change, but they cannot prevent it. The important question is—What basis of representation and method of voting shall be adopted to best meet the needs of the new conditions that have arisen? Already the subject is engaging the attention of political students in Great Britain, and it is confidently predicted that the unwritten constitution of the Old Country will undergo some change. Occupying the commanding position he does in the present Parliament, and suffering the handicap of a much smaller representation in the House of Commons than the vote polled by his candidates in the country justly entitles him to, Lloyd George will not long remain content with things as they are. He can, and probably will, demand as one price of his continued support of the Ramsay MacDonald Labor Government a reform of electoral methods and machinery which will accord full value to every individual vote cast, and not place third or fourth party candidates at a distinct disadvantage.

Whether the solution is to be found in larger multiple-member constituencies replacing the present single-member seats, with the adoption of the single transferable ballot, or even Proportional Representation, or in a complete change in the accepted form of cabinet responsibility, involving a fixed term for Parliaments and Legislatures, denial to a government of the right of dissolution except upon a straight vote of want of confidence, and the formation of a cabinet consisting of representatives of all groups, and based upon their respective numerical strength in the House, time alone will disclose.

One thing, however, may be accepted as sound, and that is that the genius of British statesmanship which in the past evolved the best form of democratic government the world has yet known will be capable of meeting the new situation and solving the problems which it presents.

When Pain Comes

What many people call indigestion, very often means excess acid in the stomach. The stomach nerves have been over-stimulated, and food sours. The corrective is an alkali, which neutralizes acids instantly. And the best alkali known to medical science is Phillips' Milk of Magnesia. It has remained the standard with physicians in the 50 years since its invention.

One spoonful of this harmless,

tasteless alkali in water will neutralize instantly many times as much acid, and the symptoms disappear at once. You will never use crude methods when once you learn the efficiency of this. Go get a small bottle to try. Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids. Each bottle contains full directions—any drugstore.

Plane In Freak Accident

Strikes Steam Roller In Making Landing At Roosevelt Field

When an aeroplane and a steam roller collided at Roosevelt Field, N.Y., the accident ruined the plane and injured the operator of the roller.

James Riddle, piloting a small monoplane in which two friends were riding as passengers, chose for his landing a part of the field which is being levelled off and on which two steam rollers were at work, hidden from the air by the cloud of dust they raised.

The descending plane took off the smoke stack of one of the rollers and bowled the operator, A. C. Madheral, from his seat, breaking his shoulder.

The plane crashed, tearing off the left wing, and otherwise damaging it beyond repair, but Riddle and his passengers escaped without injury.

NEW HEALTH FOR TIRED-OUT WOMEN

Found In the Rich, Red Blood Dr. Williams' Pink Pills Actually Make

Anaemia comes on gradually, beginning with languor, indisposition to mental or bodily exertion, irritability and a feeling of fatigue. Later comes the palpitation of the heart, headaches, frequent backaches and often disturbed digestion and an inability to obtain rest at night. Cases of this kind, if neglected, become more serious, but if taken in time there is no need to worry. Dr. Williams' Pink Pills, which are free from any harmful or habit-forming drug, are just the tonic needed to remedy this wretched state or health. These pills actually make the rich, red blood that stimulates and strengthens every organ and nerve in the body. Thus strength and activity return, the appetite improves and restful sleep is had. What Dr. Williams' Pink Pills can and will do is shown by the case of Mrs. D. B. Fanning, Seal Harbor, N.S., who says:—"I was in a badly run-down condition. I was pale, my appetite was very poor, and the least exertion would leave me completely tired out. In fact I was hardly able to do much work about the house. I decided to try Dr. Williams' Pink Pills and after taking a few boxes can truthfully say I had gained greatly in health and strength and was able to go about my work with no sign of the former weakness. I cheerfully recommend them to all others who may be in a run-down condition." You can get the pills from your druggist, or by mail at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Plant Grows Leaves After Having "Sleep"

Replaces Withered Foliage In Fifteen Or Twenty Minutes

After "sleep" of from 15 to 20 minutes, a plant, recently developed in Germany, produces new leaves. So sensitive is it that if the leaves are touched, or a match burned near them, they immediately wither and fall off. In about a quarter of an hour after the withered leaves have dropped off, new ones grow out. The plant is a member of the mimosa family. It grows in great quantities in India, where it is gathered and sold for commercial purposes. The bruised leaves are said to have a high medicinal value in healing burns.

Recognized as a leading specific for the destruction of worms, Mother Graves' Worm Exterminator has proved a boon to suffering children everywhere. It seldom fails.

Keeps a Mouse Farm

Have you ever heard of a mouse farm? There is one at Rayleigh, in Essex, where mice are reared just as cattle and sheep are on ordinary farms. There are 50,000 mice, and of nearly every color. Yet, although there are so many, Mr. Tuck, the farmer, can put his hands on any one of them at a moment's notice. About three hundred young ones are born every day, and it takes five hours to feed them all. They are sold to colleges and hospitals for experiments.

Canada's Iron-Making Centres

The three iron-making centres in Canada are: Sydney, Nova Scotia, on the Atlantic Coast, and Hamilton and Sault Ste. Marie in the province of Ontario.

Keep Minard's Liniment always handy.

U.S. To Reduce Military Expenses

President Hoover Says Military Budget Now Greater Than Any Other Country

President Hoover intends to establish a commission of army officers within the general staff to see what can be done toward reducing military expenditures.

The commission, the president said recently, would be charged with making an enquiry to determine what has been made obsolete by scientific advancements and could be done away with, and what army programmes can be spread over longer period than originally intended and at the same time maintain complete and adequate preparedness.

The president said the purely military expenses of the United States constitute a military budget greater than that of any other nation and at a time when he considers there is less danger of war than at any period within the last fifty years.

It is now estimated, he said, that the military outlay for 1923 will be \$803,000,000, which is \$120,000,000 more than the similar expenditure for the fiscal year just closed, and compares with an average pre-war expenditure for military activities of the army and navy of \$266,000,000 annually.

A notion prevails that no automobile driving is reckless unless an accident happens.

Only the uninformed endure the agony of corns. The knowing ones apply Holloway's Corn Remover and get relief.

Tusks of 4,000 elephants go into the world's annual supply of billiard balls.

Turner Valley Oil

Production and Revenue Shown To Be Increasing Rapidly

The Turner Valley oil field in Alberta becomes increasingly significant and its production and revenue are steadily increasing. A continuous rise in naphtha production has been recorded month by month since the beginning of the year. In January there was a total of 38,501 barrels turned out with a value of \$154,000, which rose by consistent increments to 92,122 barrels worth \$368,480 in June. The total for the six months of the year was 386,272 barrels of crude naphtha worth \$1,545,088. The expectation is for fully 100,000 barrels in July which would give a revenue for the month of some \$400,000.

The Terror Of Asthma comes like a thief in the night with its dreadful throttling, robbing its victim of breath. It seems beyond the power of human aid to relieve until one trial is made of that remarkable preparation, Dr. J. D. Kellogg's Asthma Remedy. Then relief comes with a rush. Life becomes worth living, and, if the remedy be used persistently, the disease is put permanently to rout. Take no substitute.

Cyclists Honor War Dead

Nearly 10,000 cyclists, many of whom had ridden all night from the extremes of England and Wales, gathered on a recent Sunday morning before the National Cyclists' Memorial, at Meridan, believed to be the exact centre of England. About 3,000 of the cyclists were girls, and most of them wore cycling breeches. A brief service was held at the memorial, which was erected seven years ago to commemorate cyclists killed in the World War.

Keep Foods Deliciously Fresh

Keep your foods—cakes, bread, pies, cut meats, etc.—under a covering of Para-Sani Heavy Waxed Paper. You'll be amazed at the length of time they'll stay fresh...delicious! Para-Sani keeps them from staling. Get Para-Sani in the handy, sanitary knife-edged carton. For less exacting uses ask for Appleford's "Centre Pull" Packs in sheet form.

by noon on Tuesday or no changes
can be made or ads. discontinued.**EDOUARD J. ROULEAU,**
Editor and Publisher**SEND IN THE NEWS EARLY**The following article was clipped
from the Gleichen Call and also per-
tains to the Chronicle.The Call would like to impress upon
press secretaries of local organizations
the necessity of getting in their re-
ports of meetings promptly after the
meetings have been held. The work
of setting up the weekly paper is asix day job and as soon as one issue
is off the press, work begins on the
next. News items have to be written
and put in type as they occur in order
to avoid a jam-up at the last. Fre-
quently we will have a report of an
entertainment or public gathering in
type and along comes another report,
written at great pains by somebody
signing himself press secretary. The
second report unfortunately has to be
thrown out and he or she is some-
times very much disappointed. Noth-
ing is to be gained by holding a re-
port of a Thursday affair until the
following Tuesday before mailing it in
and likely in the meantime the editor
has had to get a report from other
sources. Write your report promptly
and everybody will be best served.**THE CAMP COOK**If you can mess about with pans and
kettlesNor weary of the smoke that fills
your eyes,Nor damn too hard a cook's bed of
nettles,Nor burn your hands through ac-
tions most unwise;If you can dare the wet and stormy
weather,And rustle grub to suit your com-
rades' needs,Wherever good fellows get together,
The world will learn the glory of
your deeds.If you can crisp the bacon till it sizz-
les

Above the morning campfire's hearty

blaze,
And turn an egg until it gently
frizzles
While other fellows lie abed and
laze;
And watch the fragrant coffee as it
bubbles
And wafts aloft an odor rich and
fine,
You'll have, of course, a cook's ex-
clusive troubles,
But all the boys will deem you half
divine.If you can fry a bass or pike pre-
cisely,Nor make a wreck of some be-
plighted duck,And serve them up in simple style,
but nicely,So all camp will bless its wond-
rous cluck;Then your reward will meet your
fondest wishes,For when it's eaten you can rise
and say:"Now, boys, I'm going to leave you
with the dishes!"And so you light your pipe and
stroll away.The question on a history paper
was: "What do you know about Queen
Elizabeth and Sir Walter Raleigh?"The answer given was: "Queen Eli-
zabeth rode through the streets of
Coventry naked to save the town. She
met Sir Walter Raleigh, who gave her
his cloak and said, 'you look dam cold.'
So good Queen Bess said: 'Dien et
mon Drott'—which means, 'By—
you're right.' "**MEDICINE HAT GREENHOUSES**

**SIXTH FORTNIGHTLY CROP
REPORT**Cutting of wheat will start early
next week and will be fairly general
a week later in a number of districts
in the province, according to telegra-
phic reports received on Friday by
the department of Agriculture for the
sixth crop report of the season. Win-
ter wheat cutting is well under way
in the south of the province and a
very satisfactory yield is reported. A
good crop of spring wheat is also ri-
pening and will yield as high as 30
bushels per acre in some southern
districts.As the result of continued dry wea-
ther and hot winds during the past
two weeks the prospective yield, par-
ticularly throughout the central part
of the province, has suffered a further
reduction. The wheat crop especially
has been affected and much of the
grain is so short in the straw that it
cannot be harvested satisfactorily by
the ordinary methods. The Depart-
ment of Agriculture, however, is de-
monstrating at a number of points in
this area a binder attachment which
will make it possible to save practi-
cally all of this short grain, and far-
mers are adopting this system with
very satisfactory results.The live stock situation has been
affected in some sections of the pro-
vince and cattle are being disposed of
in view of the limited prospect of
winter feed. In a few districts it will
be necessary to make provision for
additional feed to carry breeding
stock and work horses over winter,
but arrangements can be made to ship
this in from other localities where hay
and feed have been less seriously re-
duced.**PEDESTRIAN RIGHTS**It would appear that pedestrian
rights of late years, apparently dead
as the dodo, have been relegated to
the museum of antiquities by hair-
brained motorists, whose chief enjoy-
ment seems to consist in "stepping on
it." These morons, in their arrested
state of juvenile judgement, conceive
they have an indisputable right to
proceed at breakneck speed on any
street, road or highway, with utter
disregard for the safety of others. It
will come as a surprise to this class
of imbeciles, that in a recent judg-
ment handed down by Mr. Justice
Archer, of Montreal, the pedestrian's
right to cross the road at intersections
is paramount. Where by-laws are in
force governing and regulating pedes-
trian traffic, the pedestrian must per-
force, recognise the existence of those
laws and be governed accordingly.
But, in absence of regulations to the
contrary, pedestrians may proceed, as
a matter of prior right, to cross the
street or road at intersections, in their
own time and direction, and have the
right of way over any or all approach-
ing vehicles. Most pedestrians, how-
ever, do not stand on the rights, but
hastily scamper and dodge the mad-
ern juggernaut, knowing that safety
of limb depends upon their ability to
evade contact with the oncoming car.
A certain sense of satisfaction accrues
to the man on the street, in the soli-
loquy that the road hog who has
just narrowly missed crushing him,
probably will end up trying to beat a
train to a crossing and, if he survives
the crash, will learn that a locomotive
can successfully maintain its
rights, even if pedestrians cannot.

A Master Scientist

Dean Boyle, Of Alberta University, Accepts Post On Research Council

It may be assumed that when the National Research Council of Canada is able to attract to its staff scientists of the calibre of Dr. R. W. Boyle, M.A., Ph.D., dean of the faculties of physics and applied science at the University of Alberta, who has accepted the post of director of the physics and engineering division of the Council, it will, before long, be able to give a very good account of itself.

Dean Boyle, although only some 45 years of age, is already one of Canada's foremost scientists, ranking not far behind Professor J. C. McLennan, of the University of Toronto. During the war he showed that he was no mere theorist in his chosen work, for he rendered important service to the British Admiralty in perfecting a device for the detection of submarines. His scientific and creative mind has also been responsible for devices for the detection of icebergs. He appears one of Canada's master scientists and it is fortunate that his services are now to be made available for Canada as a whole. The University of Alberta has now given two of its staff to the National Research Council. Dr. H. M. Tory, chairman of the council, is a former president of that institution.

Minard's Liniment for Summer Colds.

HIGHLY PRIZED TROPHY

This is the Beatty Trophy, presented by the chairman and president of the Canadian Pacific Railway, for inter-regimental competition among pipers of Canadian Highland Regiments, to be played for at the Highland Gathering and Scottish Music Festival scheduled to be held at Banff August 30 to September 2. The gathering brings together pipers from one end of Canada to the other, from Nova Scotia to British Columbia, and is the great event of the year in Scottish-Canadian circles.

Made-In-Canada Exhibition

Will Show Public Quality Of Goods Produced In Dominion

Co-operation of various bodies with the National Produced-in-Canada Exhibition, which will be held in Montreal from November 4 to 9, already seems assured, according to reports received by the Canadian Manufacturers' Association, Quebec division, Montreal branch. "These reports," says the Gazette, "show the consensus of opinion strongly supporting the scheme to illustrate to the public, through the medium of the exhibition, the quality and diversity of goods which are produced in Canada by Canadian manufacturers for Canadians."

Sheep Shearing In Alberta

Sheep shearing in the Picture Butte District, Alberta, is now about finished. Last year there were only five flocks in the district; this year there are 23, mostly ranging in size from 35 to 150 ewes.

SUNDAY SCHOOL LESSON

AUGUST 11

DANIEL AMONG THE LIONS

Golden Text: "The angel of Jehovah encampeth round about them that fear Him, and delivereth them."—Psalm 34:7.

Lesson: Daniel 6:1-28.

Devotional Reading: Psalm 91:9-16.

Explanations and Comments

Daniel's Promotion, verses 1-3.—It pleased Darius to make Daniel one of the three presidents over his satraps, and because "an excellent spirit was in Daniel," the king thought to set him over the whole realm.

The Ingenious Plot Of Daniel's Enemies, verses 4-15.—The jealousy of the other two presidents and of all the satraps led them to try to compass Daniel's death. His record was unassailable; they saw that only on the ground of his religion could he be attacked. They then concocted a scheme so to play upon the king's vanity as to induce him to pass a law that for thirty days no one should ask a petition of any god or man save the king only—as though he were a god to whom the whole nation must pay divine honors. Whoever should violate this decree should be cast to the lions. There was no allusion to Daniel; the king was immensely flattered and, all unsuspecting of the purpose behind the request, fell into their trap. Evidently he took no time for reflection, but immediately signed the law, and the law of the Medes and Persians altereth not. The unalterableness of a decree of a Persian king is frequently referred to in the Book of Esther.

"Darius illustrates the danger of adopting suggestions without considering their consequences. The probable consequences of acts which we contemplate should always be carefully considered, especially in their bearings upon others."—J. E. McFadyen.

Daniel continued his habit of prayer just as he did before the decree was issued; and not only did he pray but he gave thanks in the face of the fate he knew was approaching.

"Early in the morning, before you come down into the streets of Babylon to hear its talk and breathe its impoverished atmosphere, open your windows. Look out upon the sources of strength. Wait upon it until your soul mounts up with wings like an eagle. Wait upon it until your moral nature can run upon errands of usefulness and not grow weary. Let your heart gain a fresh sense of the moral interest it cherishes toward you—and you will not be afraid of Babylon and all its lions."—Charles R. Brown.

As Daniel was consigned to the den of lions, the king said to him, "Thy God whom thou servest, He will deliver thee."

After sealing the mouth of the den with his seal, the king passed the night sleepless and fasting, and in the morning hastened to the den.

quivering with grief, he cried to Daniel, "My God hath sent His angel, and hath shut the lions' mouths," answered Daniel, who was there unharmed.

A New Safety Device

Polish Fliers Make Test Of Life-Saving Overalls

"Life saving overalls," designed for trans-Atlantic fliers, were given successful tests in Lake Maggiore, Italy, by two Polish fliers who hope to fly from Milan to Chicago in mid-August.

The overalls are of an especially heavy rubberized fabric, equipped with valves by which they may be inflated. They will keep their wearers afloat for many days, their inventor asserts.

An added novel feature of the garment is the equipment of electric batteries and light bulbs which will remain illuminated at least 60 hours, De Favori says.

WORLD HAPPENINGS BRIEFLY TOLD

Lady Jane Moreton, mother of Lady Byng, died at Brighton, England, very suddenly at the age of 83 years. She was the widow of Sir Richard Moreton, son of the Earl of Duple, who died in March, 1927.

William Johnson, a powder monkey when the last shots were fired in the Crimean War, and a witness of the last hanging for naval insubordination, died recently at Weymouth, England, aged 85.

Official circles have intimated that the government was considering the possibility of voluntary curtailment of naval building as a gesture supporting building suspensions announced by Premier Ramsay MacDonald, of Great Britain, and President Hoover of the United States.

Seth B. Nicholson, observer at the Mount Wilson observatory, said a gigantic spot has been discovered near the equator of the sun. The spot, described as having eighty times the magnetic intensity of ordinary sun spots, Dr. Nicholson said, was powerful enough to cause serious magnetic storms on the earth.

For Scalds Or Burns.—Dr. Thomas' Electric Oil is a standard remedy for the prompt treatment of scalds and burns. Its healing power quickly soothes the pain and aids a speedy recovery from the injury. It is also an excellent remedy for all manner of cuts, bruises and sprains, as well as for relieving the pains arising from inflammation of various kinds. A bottle in the house and stable saves many a doctor's and veterinarian's fee.

Commemorate Harvester Inventor

A memorial stone is to be placed on the site of the building where the first successful twine binding grain harvester was produced at Beloit, Wisconsin.

It Bids Pain Begone.—When neuralgia racks the nerves, or lumbago cripples the back is the time to test the virtues of Dr. Thomas' Electric Oil. Well rubbed in it will still the pain and produce a sensation of ease and rest. A trial of it will establish faith in it.

In Mammoth Cave, Kentucky, there are fish and crayfish that have no eyes.

The cow is worshipped as a sacred animal in India.

566

DRAPED FLARE

A new silhouette for the youthful smart woman. It shows the raised waistline, a chic detail in all Paris frocks. The circular skirt in diagonal movement is draped at left side which is suggestive of wrapped treatment. Style No. 566 combines printed and plain cotton voile, the popular summer fabric. It comes in sizes 16, 18, 20 years, 36, 38, 40 and 42 inches bust. The deep slender hipline, makes it suitable for the larger woman, by placing the circular fullness low. Chartreuse green chiffon, tomato red crepe de chine, yellow handkerchief linen, orchid and white printed lawn, purple aster georgette crepe, printed rajah in capucine tones, and sky-blue sheer lace are distinctly smart combinations for this charming afternoon model. Pattern price 25 cents in stamps or coin (coin is preferred). Wrap coin carefully.

WINDOLITE

MADE IN ENGLAND

The Improved Glass Substitute

COMES WITH A MESSAGE OF HEALTH

THE sun is the all-powerful life producer. Nature's universal disinfectant and germ destroyer, as well as stimulant and tonic. WINDOLITE is the sun's most important ally.

Medical research has definitely proved that from the point of view of Health and Hygiene, the most effective among the sun's rays, are the Ultra-Violet rays, which possess the greatest power for the prevention and cure of disease and debility.

Science has further established that ordinary window glass does not allow the passage of Ultra-Violet rays, so that by using glass we are artificially excluding these vital health-giving rays. Therefore, the invention of WINDOLITE has completely satisfied the long-felt want. Exhaustive experiments have conclusively proved that it is a most effective substitute for glass, that it freely admits the Ultra-Violet rays, and that its use has a most beneficial effect on the growth and development of plants and chickens and on the well-being of cattle, enabled for the first time to have healthy light instead of darkness in their sheds.

Indeed, the discovery of WINDOLITE has during the last six years completely revolutionized gardening, given a new stimulus to poultry breeding, increasing the egg-laying capacity and fertility of chickens, has greatly improved the health of cattle and is now being used in domestic and household requirements.

WINDOLITE stands for 100 per cent. sunlight. It makes light but strong windows for cattle sheds, dairy stables, poultry houses, brooders and all out buildings. It is economical, unbreakable, flexible and is easy to cut and fit. It is now being successfully used for sunrooms, verandas, schools, factories, hospitals, sanitariums, hot beds, plant coverings and greenhouses. It keeps out cold—will not crack or chip—cuts with an ordinary pair of scissors and is easy to fit. WINDOLITE is supplied in rolls any length but in one width of 36 inches only. A square yard of WINDOLITE weighs about 14 ozs., while a square yard of glass of ordinary thickness, weighs about 135 to 140 ozs. The improved WINDOLITE requires no varnish. WINDOLITE is made in England.

Price \$1.50 Per Square Yard, f.o.b., Toronto.

POOL PAYMENT OF FORTY MILLION ON 1928 CROP

Winnipeg.—Nearly \$40,000,000 is being distributed as a second interim payment on wheat and coarse grains by the Canadian Wheat Pools. The basis of the wheat payment is 21½ cents per bushel No. 1 Northern, Fort William; 18 cents on No. 2; 17½ cents on No. 3; 22½ cents on No. 4; 16 cents on No. 5; 8 cents on No. 6, and 7½ cents on feed wheat. There is a wide range in the payments on other grades, varying from as high as 34 cents and 36 cents per bushel on one or two grades, down to 2 cents per bushel on the smallest parcels.

Interim payments on Durum wheats are: No. 1 Amber Durum, 15½ cents; 16 cents on No. 2; 12 cents on No. 3; 13½ cents on No. 4; 14 cents on No. 5; 6½ cents on No. 6, and 14 cents per bushel on feed Amber Durum. Last year the Pools adopted a new policy of adjusting all spreads and making deductions for elevator and commercial reserves, carrying charges, etc., from the second interim payment, and this course has been followed this year. As a result, the final payment, which will be made at the end of the crop year, will be a flat payment on all grades.

In making the above announcement, E. B. Ramsay, general manager of the Canadian Wheat Pool, made the following statement regarding the interim payment on grade six and feed wheat.

"Pool members who delivered wheat of these grades will remember that when the reduction was made in the initial payment last fall, from one dollar to 85 cents per bushel a concession was made to members delivering the lower grades to meet a very difficult situation. A larger proportion of the price of their grain was paid than in former years; for while the drop in the initial payment on the top grades was 15 cents below the previous year's basis the drop on No. 6 and feed wheat was only five cents per bushel. Prices of the lower grades, therefore, did not depreciate from the previous year's prices in the initial payments, in the same proportion as did the higher grades, even in the face of the very heavy deliveries of these lower grades which the Pool received."

The first interim payment on the 1928 crop was made by the Wheat Pool on March 1, last, when a flat payment of 12 cents per bushel was made on grades one to feed, with the exception of grade No. 6, on which the payment was 10 cents per bushel.

An interim payment amounting to over two and a half million dollars is also being distributed by the Coarse Grains Pools of Manitoba and Saskatchewan. An interim payment of 15 cents per bushel on 2 C.W. oats brings the Pool payment to the present to 55 cents per bushel, and 11½ cents payment on 3 C.W. oats brings the payment on that grade to 48½ cents per bushel. The interim payment on barley is 7½ cents per bushel, bringing the total to date on 3 C.W. barley up to 67½ cents. The interim payment on flax is 34 cents per bushel, No. 1 N.W. bringing the total to date up to \$1.96 per bushel. Interim payments on rye are 9 cents per bushel for Nos. 1 and 2 C.W., 9½ cents for No. 3 C.W., and 10 cents for rejected. Earlier payments amounted to 82 cents per bushel for Nos. 1 and 2 C.W.

Sentenced For Manslaughter

London, England.—Richard Joshua Reynolds, 23-year-old American, of the wealthy Reynolds tobacco manufacturing family, was sentenced in Old Bailey Court to five months imprisonment without hard labor on a manslaughter charge growing out of an accident last May in which a motor cyclist was killed.

Progress Is Satisfactory

London, Eng.—Recent satisfactory progress toward an Anglo-American agreement on naval limitation has raised the belief in well-informed circles here that participation of other naval powers in the conversations may not be delayed as long as previously was anticipated.

W. N. U. 1797

Development In Aviation

Vancouver and Halifax May Be Linked By Air Route By 1931

Winnipeg.—Unprecedented development of aviation in Canada and the possibility of the Dominion realizing a transcontinental air mail service, linking Vancouver and Halifax by 1931, were heralded here by Major Gen. J. H. MacBrien, of Ottawa, president of the Aviation League of Canada.

Completing 1,500 miles of a solo flight from Ottawa, the famed Canadian flying "ace" piloted his little Gypsy Moth to a perfect landing at Stevenson Aerodrome, Winnipeg. General MacBrien is en route to the Pacific coast.

"Progress in Canadian aviation has been satisfactory," said Gen. MacBrien, "and a rapid development is taking place. Commercial aviation is growing steadily in Canada. New mail routes are being opened all the time, new flying clubs are being formed, and generally the situation is very promising."

Referring to the establishment of a transcontinental airway, Gen. MacBrien stressed the importance of perfect organization and pointed out that links were already started in both the east and west.

"Completion of the service will witness feeders being supplied from northern provincial districts such as Hudson Bay, Peace River, Northern Ontario and Quebec," he said, "and eventually the Dominion will boast of one of the most extensive and enterprising services in the world."

Increase Shown In Infantile Paralysis

Warning Sent Out From Ottawa To Guard Against Outbreak

Ottawa.—Telegrams went forward from Dr. J. A. Amyot, deputy minister of health in the Dominion Government, to all the deputy ministers of health in the provinces advising them that returns showed an increase in infantile paralysis and warning them as to the best methods to be adopted should the situation become acute.

A "blue book" is also being rushed through the Government printing bureau and will be widely distributed explaining the disease and how to combat it in the light of recent developments. The book has been written by Dr. Helen MacMurchy, chief of the division of child welfare. It will be issued under instructions of Hon. Dr. King, Minister of Pensions and National Health. Some three years ago infantile paralysis was prevalent in California and other Pacific Coast states. British Columbia was not seriously affected. In 1927 it spread to Alberta where there were 354 cases. Last year it reached Manitoba where there were at least 435 cases. The increase noted is in Ontario. The department does not wish to frighten the public, but it does wish to advise them of a danger which may develop quickly because of the contagious nature of the disease.

Canada At League Assembly

Hon. W. D. Euler May Represent Dominion At Coming Meeting

Ottawa.—Canada will probably be represented at the coming meeting of the Assembly of the League of Nations by Hon. R. Dandurand, Hon. W. D. Euler, Minister of National Revenue, and another member of the Dominion Government. The selection of Canada's representatives will be made definitely at the next meeting of the Cabinet, it is understood.

Mr. Dandurand, who is Canada's representative on the Council of the League, will certainly go to the Assembly and it is understood that Mr. Euler will be one of his companions. Just who else will go is not known.

To Attend Labor Session

Ottawa.—Right Hon. J. H. Thomas, Lord Privy Seal, in charge of the unemployment situation under the Labor Government in Great Britain, has accepted the official invitation of the executive of the Trades and Labor Congress of Canada to be present at its convention which will be held at Saint John, N.B., during the week of August 26.

HEADS ONTARIO MASONS

C. R. McKeown, of Toronto, chairman of the Ontario Railway Board, who has been elected grand junior warden of the Masonic Grand Lodge of Canada in the province of Ontario.

Edmonton Judge Holds Court At Aklavik

Travels 2,000 Miles To Teach Eskimo He Broke the Law

Aklavik, N.W.T.—A verdict of guilty of manslaughter was returned in the case of Okchina, Eskimo, by a jury at Aklavik, recently, before His Honor Judge Dubuc, of Edmonton. The trial was held at Aklavik, in the Northwest Territories, with judge and jury.

Okchina, the Bathurst Inlet Eskimo, was found guilty of murdering Oksusk, another Eskimo, in the fall of 1927.

The jury considered for two hours and brought in a verdict of manslaughter, through their foreman, Dr. A. Truesdell. Okchina was sentenced to one year's imprisonment at Herschel Island.

This is the end of this year's judicial party's journey to the north to bring to the Eskimos two thousand miles from Edmonton that British fair play and justice for which the British empire has fought throughout centuries.

Ontario Election Predicted

Toronto.—The Mail and Empire (Conservative) says:

"A Conservative high in the official councils of his party in Toronto confidently predicted to the Mail and Empire that Premier Ferguson would go to the country early in November. The date would be in the first half of the month, because, he said, there was a strong feeling among the leaders, including the premier, against anything approaching winter campaigning."

CELEBRATE DOMINION DAY IN JAPAN

The photograph here shows a scene at the new Canadian Legation in Tokyo, Japan, on last Dominion Day, when celebrations, its first public function, were conducted in the grounds and the Canadian flag was officially raised for the first time in the Orient.

Cotton Strike Still Far From Settlement

Powerful Weaving Branch Refuses To Consider Wage Reduction

Manchester, Eng.—Lancashire's cotton mill stoppage continues with prospects slimmer than ever for an immediate settlement and return to work of its striking operatives.

The employers professed still to be ready to negotiate for a solution of the dispute and the card room workers and spinners seem prepared to negotiate with them, but the powerful weaving branch was determined to remain adamant in opposition to the proposed wage reductions.

Meanwhile a section of the British press commented on the serious loss to British industry growing out of the stoppage as a consequence of the opportunity it gave rivals to seize the national trade.

Germany, France and Japan were reported in these quarters as optimistic over the opportunities presented. The Mail declared northern France would reap a golden harvest, orders which ordinarily would go to Lancashire going to Lille, Roubaix and Tourcoing. The paper said the French textile mills were working at top speed.

The Express printed an article by an unnamed authority, attacking the obsolete organization of the cotton industry, which the writer said, is still bound by the methods of 60 years ago, absurd under present conditions.

To Form Canadian Geographical Society

Will Aim To Make This Country Better Known To Canadians

Ottawa.—A national board of directors has been elected as a first step in establishing the Canadian Geographical Society aimed at making his country better known to Canadians and to those outside the Dominion. The society intends to issue a magazine.

The directors are: Dr. W. B. Brock, University of British Columbia; Dr. R. C. Wallace, president University of Alberta; Dr. W. C. Murray, president University of Saskatchewan; J. W. Daffoe, managing editor Manitoba Free Press, and Dr. Charles Camsell, Deputy Minister of Mines.

Admits Bank Robbery

Smithers, B.C.—James Wesley Burke, captured recently after a two weeks' man hunt, has confessed to robbing the Royal Bank here of more than two thousand dollars on July 17. He was committed for trial on a charge of robbery with violence. Practically all the money taken has been recovered.

WESTERN PORT IS LEADING IN GRAIN SHIPMENTS

Ottawa.—Vancouver leads the country in grain export with a volume of 54,233,652 bushels passing through the port up to the end of the first six months of the calendar year, commencing June 1, according to figures compiled by the harbor commissioners for the port. Montreal exported 43,549,140; Saint John, 22,622,984, and Quebec, 3,587,273 bushels of grain. No exports of this commodity passed through St. John in May or June, the opening of navigation resulting in a transference of that business to Montreal, whose figures for the year begin with the month of May.

The volume for Halifax is not available, but is known to be considerably greater than last year. Grain from the United States furnished more than fifty per cent. of St. John's exports, American exporters shipping 12,281,939 bushels against 10,341,054 bushels Canadian grain. This quantity of the American commodity was greater in the first four months of the current year than in the whole of 1928.

Last calendar year Montreal shipped 211,295,379 bushels, of which 148,599,958 was Canadian grain and 62,695,421 American. Vancouver shipped 97,250,548 bushels, all Canadian grain. Vancouver's exports increased by 55,233,521 bushels over 1927 and Montreal's by 16,047,465 bushels.

Making Secret Trip In Moth Airplane

Believe Machine Going North For Mineral Exploration Purposes

The Pas, Man.—A secret trip into the Northwest in a moth plane is underway with Capt. W. N. Sherlock, of Dominion Explorers' aerial staff, at the controls. The flyer hopped off from here for Lac La Ronge, in northern Saskatchewan. While the aviator refused to discuss his trip, it is stated in mining circles that the machine will be taken into the far North for mineral exploration purposes.

If successful, the venture will likely set a new Canadian record for light planes of the moth biplane type. Most of the country over which the machine is flying is remote from habitation and a forced landing enroute would place the pilot in grave danger.

Rain Mars Opening Of Scout Gathering

Downpour Drenched Thousands Who Attended Rally In England

Arrowe Park, England.—Drenching rain pelted the international gathering of 50,000 boys of the Boy Scouts' World Jamboree as the gates opened to civilians flocking to witness the formal opening of the great rally by the Duke of Connaught. The Scout answer to the downpour was to break out in raincoats and slickers of all kinds and to carry on with cheers.

The gathering of the troops of boys from 42 nations on the parade ground for the rally, however, developed into a very damp job.

Two Killed By Explosion

Metal and Tank Blown 200 Feet Into Air

Trail, B.C.—Two men were killed almost instantly and a third injured when an acetylene gas tank exploded in the acetylene burner shop of the Consolidated Reduction plant here.

The explosion threw metal 200 feet into the air. The tank itself rose to that height and came crashing back through the roof of the gate house, doing damage there.

Tax Receipts Larger

Ottawa.—Income tax receipts for the first quarter of the present fiscal year (ending June 30) totalled \$56,035,317 over the corresponding quarter of 1928, according to the Minister of National Revenue. The gain is attributed to larger incomes received and to more strenuous efforts in the collection of the taxes.

The Singing Fool

By HUBERT DAIL

Copyright, 1928, Warner Bros. Pictures, Inc.

SYNOPSIS

Marcus, the famous Broadway producer, takes a party of four to Blackie Joe's New York night club. Al Stone, Blackie's chief comedian and singing waiter, is desperately in love with Molly, the ballad singer, but she scornfully tells him she will never marry a waiter. After she refuses to read a love ballad he has written for her, she goes to the Marcus table and tries to ingratiate herself with the great producer. Al is in despair, but at Blackie Joe's suggestion he goes on the floor and sings the love song himself — to Molly. He is given a marvelous ovation. Grace, the cigarette girl, who is deeply in love with Al, is in tears. Even Molly is touched. Marcus asked enthusiastically, who wrote that song? and Molly answers, "The waiter—but I gave him the idea."

CHAPTER VII.

Marcus gazed at Molly with renewed interest.

"You gave him the idea, did you? Well, that number has a corking idea. I have a show where I can place it right now. Can you get the waiter over here? I want to talk to him."

Molly was up in a flash. "Of course he'll come over. I'll get him for you right away."

She tripped away rapidly, heading for Al, who was still standing in the main room by the dressing-room door. The crowd was clamoring for an encore and Molly walked among the clapping customers, hardly able to credit the turn in events. One thing was certain, Al, the obscure waiter, was already on the high road to an immense success. If Marcus took one song he would take others that Al had written. And this was the man whose love she had scorned but a half hour before? That was the song she had refused to read and pushed carelessly from her dressing table!

How would Al greet her now? She wondered as she walked toward him. Would he show pique because she had dismissed him; would his pride make him treat her coldly? Meanwhile, Blackie Joe was using

Her Little Boy Was Very Ill With Summer Complaint!

Mrs. Ray Fisher, Lebrét, Sask., writes:—"For over a month, last summer, my little boy was suffering from summer complaint. He got so bad there began to be traces of blood in his stool, and anything he ate would not stay on his stomach very long. He became so weak he could not stand up. A neighbor recommended

was half used he was the same happy, healthy boy he was before he took sick."

Put up only by The T. Milburn Co., Ltd., Toronto, Ont.

W. N. U. 1797

his best efforts to induce Al to sing an encore.

"Go out once more, Al," he pleaded. "Give them something else — anything will do. Can't you hear how they've stopped the show for you?"

But Al shook his head. "No, Blackie, I can't do it. I put everything I had into that song. I just can't repeat."

Blackie saw it was hopeless to argue. Al's face was white as a sheet; it was evident that the boy had drained his emotional energy to the utmost in putting the song over. Blackie turned quickly to a troupe of dancing girls and ordered them on the floor.

And then Molly swooped into the picture to seize Al's hands.

"Al, you were marvellous. I never heard anything like it. It's a beautiful song and every word thrilled me!"

Not until then did Al react sharply to his triumph. After all, the applause of the crowd was merely incidental, he had really been singing to Molly, and to her alone. And here she stood, looking up into his face with gentle understanding eyes, confidently near and dear to him. He tightened his grip on her hands and murmured earnestly.

"You see . . . now . . . how I feel?"

There was burning devotion in his glance and Molly answered him with a look fully as ardent. Then she said,

"Yes, Al, I do see now. I was a fool not to see before. Will you forgive me?"

Forgive her! He could hardly keep from taking her in his arms right there in the main room, with Grace and Blackie nearby and the admiring eyes of the crowd on him.

And then Molly's eyes dropped before the burning intensity of his gaze. Perhaps it was a feminine trick to make him feel she was abashed at letting him read her heart, perhaps she really was a trifle ashamed at playing up to him this way and deceiving him. For she didn't love him.

Grace, standing nearby, had watched this scene in its entirety. She understood it thoroughly. Something had happened besides Molly's reaction to the song to make her approach Al so tenderly and possessively. But whatever the cause Grace knew that Molly's renewed interest in the singing waiter sounded the death knell to the faint hopes that persisted in her own heart. Al belonged to Molly—he showed it by each word and play of expression. His love made him supremely happy and—there was nothing for Grace to do but slip away and try to pretend that she didn't carry an aching heart.

"Al," said Molly excitedly, "you're in luck! You know, that's Marcus of Broadway at the table where I was sitting. He thinks your song's a wow and he wants to see you. I've been plugging for you and telling him how good you are!"

"Marcus!" ejaculated Al.

"Yes," whispered Molly, "and you know what that means. It means success for both of us."

In this way did shrewd Molly link herself with Al, as a matter of course. He accepted it blissfully; it seemed ages ago that she had turned angry eyes on him. Now she was the Molly he adored and believed in, the radiant and affectionate Molly. She quickly wheeled him around, slipped her arm confidentially into his, and led him toward the Marcus table. In that moment she realized that she held him in the hollow of her hand: she could do with him as she pleased.

At the Marcus table Al was quickly introduced. Then the producer came directly to the point.

"You have some great catch lines in that number," he said, "and a good melody. I want it for my revue and I'll get it published for you."

Al sat down, facing Marcus. He was awed and fascinated by the man's appearance and authoritative manner. He knew Marcus by reputation—everybody in New York did—and he understood that Marcus's okay meant bright light fame for him, a mere singing waiter. Yet so blinded was Al by his adoration for Molly that it never occurred to him to think she was playing up to him because of Marcus's suddenly bestowed approval.

As Al faced the producer he felt Molly's hand, slipped surreptitiously and confidently into his own. He

Dry mouth and parched throat are grateful for the refreshing coolness of Wrigley's Spearmint.

Wrigley's whitens teeth, sweetens the mouth, clears the throat and aids digestion, while the act of chewing calms and soothes the nerves.

smiled happily and answered Marcus:

"But you know, that's not my song."

"Not your song?" repeated Marcus, obviously puzzled. Then he glanced toward Molly. "You said he wrote it."

"Yes, I wrote it," added Al quickly, "but it's really Molly's song. I wrote it for her—I couldn't have written it without her."

Marcus waved the remark aside; he wasn't interested in the sentimental reason for the song's creation.

"I don't care about that — you turned out the words and music. I want the number. I want all you can write like it. If you can hold up to that level and repeat consistently I can make your fortune for you!"

Marcus spoke convincingly — Al realized that he meant every word he said. But in all this talk he did not mention Molly. If the producer believed he could push Molly aside, thought Al, he was sadly mistaken. Al was determined that she should share in any success that came to him. He decided to speak plainly.

"I want Molly to sing everything I write," he asserted. "I want you to have the song, but if you take it you'll have to take Molly too."

Al thought the producer's face fell a trifle at that ultimatum.

"Don't you see," argued Al, almost vehemently, "that no one can put over my heart songs the way Molly does. You've never heard her sing—she's a wonder! And this number was written for her!"

Marcus shook his head. "But I've got a headliner of my own — a marvellous little girl. Your song will fit her perfectly."

"Headliner?" countered Al. "Yes, I know, but Molly would be a headliner, too, if you just give her a chance. Mark my words!"

Al scarcely recognized himself, talking up to this celebrity just as if Marcus didn't mean a thing to him. He felt Molly's grip on his hand tighten. Then, suddenly, the revue expert threw up his hands in acquiescence.

"All right, come to my office tomorrow. Both of you!"

(To Be Continued.)

Law and Order in N.W.T.

The maintenance of law and order in the vast regions known as the Northwest Territories of Canada is one of the important branches of the work of the Royal Canadian Mounted Police. The administration of this great area is carried on by the Northwest Territories and Yukon Branch of the Department of the Interior.

If you can pick and choose don't choose to pick flaws.

People who weigh their words seldom speak lightly.

Sprains

Use Minard's immediately. It soothes the pain and draws out the inflammation.

Sky Scraper Apartment For Chicago Suburbs

Buildings De Luxe Designed Only For Wealthy Occupants

A realty development group in Chicago is planning to take the skyscraper out into the country. It proposes the erection of a fifty-apartment "cloud-piercer" on a fifty-acre suburban tract "surrounded by country clubs and forest preservers." The apartment dwellers will have on their own collectively owned premises a golf course, tennis courts, a bridge path, a swimming pool and recreation fields for adults and juveniles. Their building will contain a clubhouse with dining, billiard and card rooms. Another community building a little distance away will house a drug store, delicatessen, beauty and barber shops, medical and dental offices. Thus the luxuries and conveniences of city life, plus the attractions and facilities of the spacious countryside, are promised the prospective buyers of these rural skyscraper apartments—which are being designed, it should go without saying, for "wealthy" occupants. —Brandon Sun.

CHOLERA INFANTUM

Cholera infantum is one of the fatal ailments of childhood. It is a trouble that comes on suddenly, especially during the summer months and unless prompt action is taken the little one may soon be beyond aid. Baby's Own Tablets are an ideal medicine in warding off this trouble. They regulate the bowels and sweeten the stomach and thus prevent the dreaded summer complaints. They are an absolute safe medicine, being guaranteed to contain neither opiates nor narcotics or other harmful drugs. They cannot possibly do harm—they always do good. The Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Little Helps For This Week

"But without faith it is impossible to please Him; for he that cometh to God must believe that He is, and that He is a rewarder of them that diligently seek Him."—Hebrews xi. 6.

But turn, my soul, Learn thou the beauty of Omniscent care; Be strong in faith, bid anxious thoughts lie still; Seek for the good and cherish it; the ill Oppose, or bear with a submissive will.

—William Wordsworth.

To me, I confess, it seems a very considerable thing just to believe in God; difficult indeed to avoid honesty, but not easy to accomplish worthily, and impossible to compass to perfection; a thing not lightly to be professed, but rather humbly sought; not to be found at the end of any syllogism, but in the inmost fountains of purity and affection; not the sudden gift of intellect, but to be earned by a loving and brave life. It is, indeed, the greatest thing allowed to mankind, the germ of every lesser greatness.

—Anne Gilchrist.

Elephant Remembered Spot Where Mate Was Killed 44 Years Ago

Alice, 110-year-old elephant, who was with Jumbo when he was killed at St. Thomas, Ont., in 1885, was back there recently. When she arrived at the spot where Jumbo was killed Alice went to her knees, stamped and writhed and trumpeted shrilly, causing eight other elephants to go on a rampage. They were quieted and when Alice had to cross the same spot again she repeated her demonstrations of sorrow. A dog which is Alice's constant companion was used to bring her away.

New Handicraft Industry

Among the women living along the shores of the Bay of Fundy and Annapolis Basin, Nova Scotia, there is being developed a handicraft industry which is making steady progress. Under the direction of Mrs. W. C. MacPherson, 51 women are engaged in the Granville Fireside Industry, making hooked rugs out of fine wools.

Showing Great Enterprise

Poultry Raisers Would Develop Breed With Four Drumsticks

Reports from Kansas of the development of a new breed of wingless chickens have inspired Jersey poultry raisers to attempt a cross-strain in which an extra pair of drumsticks will replace the discarded wings.

A breed which will be all white meat with no neck is also being sought by some iconoclasts, regardless of the dire effect on church suppers and pot-pie dinners for fire companies, which, according to their patrons, find wings and necks their mainstays.

Some farmers have expressed the fear that their flocks will be annihilated by automobiles when they have no wings to assist them in dodging cars, so one enterpriser is seeking to originate a breed of chickens which won't cross a road.

Miller's Worm Powders are a prompt relief from the attacks of worms in children. They are powerful in their action and, while leaving nothing to be desired as a worm expellant, have an invigorating effect upon the youthful system, remedying fever, biliousness, loss of appetite, sleeplessness, and other ailments that follow disorders caused by worms in the stomach and bowels.

Minard's Liniment for aching joints

Rheumatism may be a joint affair when there is only one party to it.

The key to success can seldom be used as a night key.

Was In Bed All Summer

"I have to work in the store and do my own housework, too, and I got nervous and run-down and was in bed nearly all summer. The least noise would make me nervous. I was told to take Lydia E. Pinkham's Vegetable Compound and I have taken seven bottles. It has made me stronger and put more color into my face. I am looking after my store and housework and my four children and I am getting along nicely now." —Mrs. J. Malin, R. R. No. 5, Barton St. East, Hamilton, Ontario, Canada.

Lydia E. Pinkham's Vegetable Compound

Lydia E. Pinkham Med. Co., Lynn, Mass., U.S.A. and Cobourg, Ontario, Canada.

WORLD'S FAMOUS THREE FUEL HART PARR

In special tests conducted by nationally known engineers who used cheap distillate fuel the great Hart Parr 18-36 registered a draw bar pull of 5,525 pounds at 2 miles per hour and 4,075 pounds at 3 miles per hour, on the belt it easily pulled the amazing load of 43 horse power. The Hart Parr is a three fuel tractor and will burn gasoline, kerosene or distillate equally well. It is the one tractor that develops its power from the cheapest low grade fuel. Hart Parris are made for small, medium or large farms and have three forward speeds to speed up hauling and field work. Drive yourself and experience the thrill of controlling tremendous power.

DON'T MISS IT

(Continued from front page)

Division was the increasing attention to the propagation of game trout in response to the public desire.

During the year two new hatcheries were constructed in Nova Scotia for salmon and trout, a pickerel hatchery in Manitoba, a whitefish and pickerel hatchery on Lesser Slave Lake, and a trout hatchery in Waterton Lakes Park, Alberta, so that the Fish Culture Division now operates thirty main hatcheries and ten subsidiary hatcheries, in addition to a number of salmon retaining ponds and egg collecting stations.

In addition to distributions of fry and eggs that were made from the hatcheries last year, the Division also placed nearly 45,000 fry and older fish from other waters in twenty-six lakes and streams, largely in the prairie provinces. Seven different species of fish were represented in these transfers. In British Columbia the hatchery distribution included salmon of various kinds, trout of various kinds, and whitefish. In Alberta the distribution was made up of trout, in Saskatchewan trout and pickerel and whitefish, in Manitoba pickerel and whitefish and in the Maritime Provinces salmon and trout. The fisheries of Quebec and Ontario are administered by the provincial authorities.

PAY YOUR OWN COSTS
RULES MOTOR LEAGUE

Many people who have had motor car windows broken by flying stones ricocheting from passing car wheels feel in their wrath that somebody should pay them some damages. But the Ontario Motor League Council has decided that highways cannot be held to be in disrepair because stones fly up and break windows. It is the duty of highways to keep the road in repair, but if the highways were liable every time a loose stone flew up and hit a car, this would mean that every loose stone would have to be removed from every bit of highway. And this last is hardly feasible.

Who Does Your
Printing?

All business houses need more or less printed matter, all of which is within the possibilities of the local printer. Yet how prone many are to pass up the home printer and let the orders go to city offices which have no interest whatever in rural communities except to get printing orders and the cash to pay for them. Business men, remember that the home paper is constantly promoting the interests of the home community and you owe it to yourself and your local paper to back up these efforts by at least having your printed matter done locally.
